

United States Tour October to December 2022

Dr Delton Chen

Speaker
Founder &
Project Director

Speaker: Dr Chen is the founder of the Global Reward policy. He developed this new climate policy to finance the reduction and removal of greenhouse gases at "speed and scale", and with the goal of stabilizing the climate for meeting the 2015 Paris Agreement. Dr Chen believes that a Global Carbon Reward can span the funding gap for climate mitigation, and can help protect communities and ecosystems. Delton Chen is a geo-hydrologist with a Ph.D. from the University of Queensland, Australia, and he is a contributor to Project Drawdown.

From climate gridlock to a regenerative financial system

The economic resolution to the climate crisis, as depicted in "The Ministry for the Future", by K. S. Robinson.

International Climate Policy

Dr Chen's presentation will introduce the Global Carbon Reward, which is a new kind of market policy that creates financial "carrots" rather than "sticks". The reward is designed to trigger a breakthrough in cooperation over climate mitigation and regeneration.

A novel feature of the policy is that "carrots" will be provided as a "carbon currency" for mitigating greenhouse gases. The new carbon currency will be supported by central banks, so that it will act as an investment vehicle and will encourage the private sector to invest in climate mitigation at the required speed and scale. The policy is designed to avoid carbon offsetting and greenwashing, and it can support communities, ecosystems, and energy networks.

Speaker Booking

We can tailor our policy presentation to meet your needs. We have options for small boardroom presentations, and for public events. Please book through our webpage.
